PROFILE

Recent Master's graduate in Data Science & Fintech, specializing in machine learning, data analysis, and software development. Proficient in Python, SQL, and predictive modeling. Passionate about building data-driven solutions.

PROFESSIONAL EXPERIENCE

March 2026 - July 2026

Data Science Intern | Creditsafe

- Processed and analyzed large-scale datasets (2M+ of records) using SQL (Redshift) and Python
- Built and optimized predictive models (XGBoost, CatBoost) for revenue and employee count estimation
- Performed feature engineering, data preprocessing, and statistical analysis
- Tuned model hyperparameters using Optuna to improve performance and reduce overfitting
- Designed automated data pipelines (ETL) for training and inference workflows using CSV and JSON data

July 2022 - August 2022

Web Developer | YLN Development

- Design and maintenance of web applications using JavaScript, PHP, and REST APIs
- Development of front-end interfaces with integration of back-end services

PROJECTS

PassMate (Production)

- Built a tool generating 10+ quiz questions per request from course materials (PDF support)
- Processed up to 3 documents simultaneously with LLM-based context management
- Optimized API usage and cost efficiency through contextual memory handling

Redaking Project (In Development)

- Local AI assistant with memory, intent classification and web data retrieval on hardware

WonderNova (In Development)

- Travel recommendation system using quiz-based scoring and multiple APIs

EDUCATION

2024-2026

Double MSc in Data Science & FinTech | University of Rennes & University of Trento - EIT Digital

2021-2024

BSc in Computer Science | University of Poitiers

SKILLS

Python, Java, C | Pandas, NumPy, SQL | Scikit-Learn, MLflow | Git, Bash | Bloomberg Terminal

Languages: French (Native), English (Fluent)

Certificates: BFF, BMC, ESG, BSA | Bloomberg
